

The biggest EXPO for innovative education in Asia

“Za Share School is a platform for education to show and to be seen”

From the naughty generation to the naughtiest school “Za Share”

In 2015, Naughty Education Fest broke everyone’s typical ideas of “education”. How do you define what is good or bad? Where can we find different possibilities? What else can “education” be imagined? Education is not only about academic qualifications, grades or something that can make you to be a “winner” in the capitalism market. The Naughty Education Fest just raised some voices and made some sparkles among Taiwan society.

But, then? We ask ourselves.

“Naughty” is just like a spirit, a call for the deeply hidden “yourself”. But the question is how could Naughty Education Fest really make an impact? How could we not just talk about it but to take action? We, team of the Naughty Education Fest, think wildly that if it is possible not just be naughty in the system but establish a new system- a new learning system, a new way of thinking what education shall be, and a new way of “being yourself”.

2016, we build the naughtiest school “Za share”. No specific professional field, no official standard, no categories, we are a school teaches you not to be taught, a chance to make your own decision. A chance to make Taiwan different.

About naughtiest school “Za Share”

It’s the naughtiest school, because it’s not a school.

It’s a school teach you be naughty, because it doesn’t teach you anything.

It’s a school that there is no being naughty or not, because $A+B \neq A+B$ here, there is no standard and no equation.

It’s a _____ (you can define) school, because everything can be done and everything can become possible here.

In nowadays, you can’t have only one skill. To face the fast-changing society, you need to be a “slash”, be multidiscipline and have more than one profession.

But no matter it’s slash or multidiscipline, it is still considering the possibility under the existing thinking of classifying. Is that mean it would be better to have more slash or know more discipline? There must be an end. Life should not be easily defined by a few words.

Is there a kind of profession called living the life?

Is there an occupation called knowing the society?

Is there a field called life?

Of course! Za Share School let you decide what you and your future should be.

Why come to exhibit here

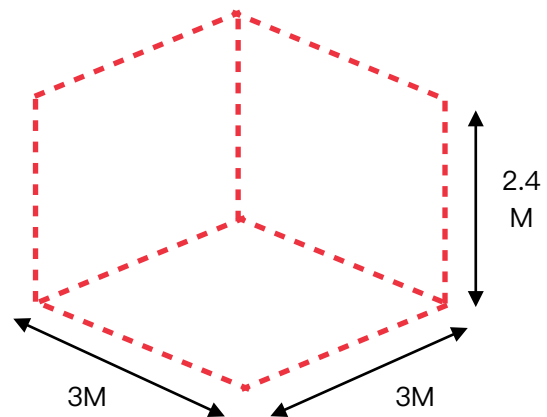

1. Largest Expo for innovative education in Asia, the simplest way to get most people know about you.
